HOUSE DISTRICT 33 STANDS UP
FOR OKLAHOMA LAND!

THEY ARE OPPOSED BY:

Keep D.C. Lobbyists OUT of Oklahoma!

THE BEHIND THE SCENES STORY ABOUT THOSE SKETCHY ATTACK ADS FROM THE D.C. AREA LOBBYIST GROUP

Massive wind turbine projects and new high-voltage transmission lines are swallowing or devaluing private property and threatening our rural way of life — driven by government-subsidized energy schemes pushed from Washington, D.C.

President Trump recently exposed the scam, warning that **this industry is not sustainable** and weakens America's energy independence, to China's benefit.

As long as the subsidies exist, corporations will rush to cash in. That's why Molly Jenkins believes these projects should stop until, at the very least, they can survive without taxpayer support and before their transmission lines take any more land from Oklahoma farmers and ranchers. **Our countryside should not be sacrificed** for an industry that hasn't proven it can stand on its own in the free market.

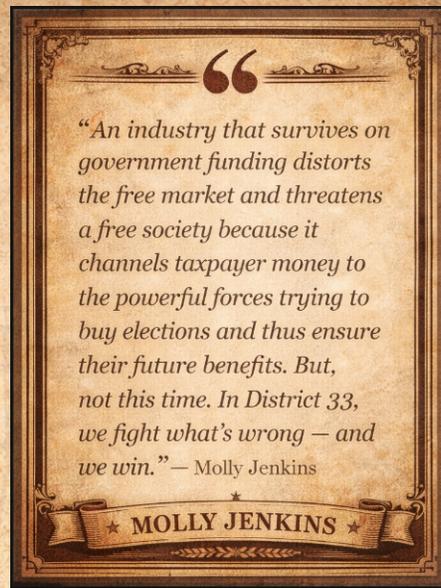

The D.C. wind lobby disagrees. They're pouring thousands into attack ads because Molly refuses to give in. She stands strong — and they want her gone.

Molly takes no lobbyist money, so she can't be bought. Her loyalty is to the voters of House District 33 — not to outside, even internationally-owned corporations that will scar our land for temporary profit and disappear when the subsidies run out. Whether it's transmission lines, wind turbine graveyards and “recycling” facilities, massive, water-consuming data centers, or other “green” industrial projects that threaten property values, Molly stands with property owners.

Her opponent? **He has made it clear: he will take the lobbyist money.**
